This application is before the examiner for consideration on the merits.

I. Applicants' prior art submission filed on 23 September 2004 has been considered to the extent of the English language as provided in the parent application no. 09/745,698 now patent no. 6,664,034.

II. A. (1) It is allowed to claim by a functional, characteristic, conditional, physical and/or chemical property of a material and /or process. (2) However, a claimed functional, characteristic, conditional, physical and/or chemical property of a material and/or process carries with a risk (In re In re Schreiber, 44 USPQ2d 1432). It is reasonable that the Office is not supplied, provided or equipped with a sufficient facility to carry out a test for the functional, characteristic, physical and/or chemical properties as claimed in accordance with the authority stated in In re Best, 195 USPQ 430; Ex parte Maizel, 27 USPQ2d 1662 or Ex parte Phillip, 28 USPQ2d 1302. The language "light-sensitive portions...having different spectral absorption waveforms " or the like is considered as the functional or characteristic property of a material. It has been considered and searched as appeared.

B. In re Schreiber, 44 USPQ2d 1429 states that "A patent applicant is free to recite features of an apparatus either structurally or functionally. See In re Swinehart... 169 USPQ 226, 228... Yet, choosing to define an element functionally, i.e., by what it does, carries with a risk.

III. The following is an examiner's statement of reasons for allowance:

(2) It is known in the art to make and obtain a color photographic material having thereon four or more spectrally different photosensitive layers to obtain a full color image.
